NEXABIOTECH
pioneers in molecular biology

Food Authentication: Patented Local Technology

We're not just manufacturing molecular kits; we're pioneering the future of molecular solutions especially for food.

About Us

NexaBiotech Sdn Bhd specializes in cutting-edge molecular technology for DNA-based diagnostics in the food sectors. Our innovative products, including patented DNA extraction methods and qPCR kits for Porcine Detection in food, set new standards for accuracy and reliability in the industry.

NEXABIOTECH
pioneers in molecular biology

Food Authentication: Local Technology

Pioneering the future of molecular solutions, especially for food.

Dnalyze Food Extraction Kit

- Malaysia-owned DNA extraction kit
- Low cost and time-efficient
- Ready stocks and short waiting time
- High DNA quality output and reproducible
- Locally manufactured (low risk towards price fluctuation)

Dnalyze qPCR Porcine Detection Kit

- Easy-to-use kit
- High specificity and sensitivity
- Sensitivity down to 0.1 pg (pork DNA) and 5 pg (porcine gelatin DNA)

NEXABIOTECH

Tested Against:

(Food Matrices)

- Meat and meat-based products
- Gelatin and gelatin-based products
- Plant-based products
- Seasoning cubes and powder
- Bird nest collagen drinks
- Oil and lard

Tested Against:

(Non-Food Matrices)

- Animal feed
- Pharmaceutical capsules
- Fertilizer
